Feature Overview:

	ErgoSoft Roland Edition (Printer Category A5)
ErgoSoft PostScript® / PDF	✓
Option Pack SE	✓
Option Pack Full	✓
1 RIPServer	✓
1 PrintClient	✓
Production Features	✓
Repeat Print	✓
Step & Repeat	✓

Feature Description:

ErgoSoft PostScript® / PDF	Includes Postscript® Level III RIP capability and Postscript / PDF Color Management.

Option Pack SE	
Density: Re-Linearization	Ability to re-linearize the color density curves.
Print Environment: Import	Import existing Print Environments.
White Ink: Basic	Usage of white inks. Includes linearization options, use white as spot color: generate white pixel automatically based on raster data.
Color Replace: Basic	Allows replacement of specific colors in an image. Basic features only permit manual entry of replacement colors.
Shrinkage Correction	Adjusts printed image size to compensate for percentage of material shrinkage.
Tiling	Automatic or manual tiling of images.

Option Pack Full	
Density: Create Linearization	Capability to create new density linearization including ink channel limiting.
Print Environment: Create	Create and edit Print Environment settings for a new printer.
White Ink: Pro	Use transparency mask, limit density, point reduction; generate spot color based on image data.
Color Replace: Pro	Allows replacing color in images using Swatchbooks and Named Colorbooks. Automatic spot color replacement in PostScript files.
Image Add-Ons	Standard Image Add-Ons like individual eyelet marks, dashed cutting line etc.
Canvas Wrap	Produces adjustable mirroring of image margin to facilitate easy wrapping of the printed image on a canvas frame
Image Presets	Automation feature. Allows to combine Image Format, Print Marks, Image Add-Ons, Image Margin, Crop, Tiling, Tune etc. as a set and to use it on specific images.
Picture Packages	Place multiple copies of a single image on a page in a predefined layout. Individual image copies can be scaled to different percentages.
Position Templates	Allows creating a template job including placeholders (image format, position etc.). Template Job can be filled with different images.
User Right	Controls access to specific parameters in the RIP and prevents accidental changes to printer settings. 2 available levels: Administrator / User.
Maintenance Jobs	Controls when to perform printer maintenance jobs either before each job or after a specific time, number of copies, number of jobs, or amount of material printed.

Production Features:	
Job Cost Calculation	The Job Costing / Job Cost Estimation calculates the ink, material, and printer cost per Job.
Job Tickets	Job Tickets are HTML Documents containing all relevant information about a job.
Job Processing Policies	The Job Processing Policies allow you to setup processing rules and settings for preflight, printing and job archiving.
Job Preflight	Preflight Feature allows creating hard and soft proofs.
1 RIPServer	1 RIPServer. Performs the raster and ripping process for a single job at a time.
1 PrintClient	1 PrintClient. Controls the transfer of ripped jobs to a single printer.
Repeat Print	Prints multiple copies of a job without a visible printed gap between each copy.
Step & Repeat	Permits importing a pattern or image and repeat it several times in the vertical and horizontal directions with options for mirroring and shifting pattern.
