Adding a VersaWorks Printer Driver on Computers Running Windows 7

By default, VersaWorks installs the RolandVW PostScript driver for the Queue-A. If you want to use the Queue-B when printing from applications such as Illustrator, you have to manually install a printer driver for the Queue-B. Since VersaWorks allows configuring automated workflows in Queue Settings, you will be able to choose from two different workflows even when printing the artwork directly from applications or from networked client computers by selecting the proper printer driver.

Before installing the driver, please install Roland VersaWorks and setup the printer in Printer Settings window.

Follow the steps below to setup a VersaWorks printer driver:

1. Navigate to Start > Devices and Printers, select any printer and click on Print server properties.

2. Select Ports tab and click on Add Port
3. Select Versa File Port for the port type, and click New Port.

![Select Versa File Port](image1)

4. Type a port name such as `VERSA-***(model)`, and click OK.

![Type port name and click OK](image2)

5. Click on `...` to locate the output folder.

![Click on ... to locate the output folder](image3)

6. Select `C:\Program Files(x86)\Roland VersaWorks\VersaWorks\Printers\(model)\Input-B` and click OK.

![Select output folder and click OK](image4)

**Tech Note:** On 32-bit operating system, the default folder will be: `C:\Program Files\Roland VersaWorks\VersaWorks\Printers\(model)\Input-B`.

7. Click OK and then Close twice to close all windows.

8. In Devices and Printers, click Add a printer.

9. Click **Add a local printer**

10. Select **Use an existing port** and select the port name created in step 4 and click **Next**

11. Select **Roland** from the **Manufacturer** list and **Roland VersaWorks** from the **Printers** list and click **Next**

12. Select **Replace the current driver** and click **Next**
13. Type the printer name such as in **RolandVW_B(model)** and click **Next**.

14. Select **Share this printer so that others on your network can find and use it**, enter the **Share name** and click **Next**.

15. Click **Finish**.
