Thank you very much for purchasing this product.

- To ensure correct and safe usage with a full understanding of this product's performance, please be sure to read through this manual completely and store it in a safe location.
- Unauthorized copying or transferral, in whole or in part, of this manual is prohibited.
- The contents of this manual and the specifications of this product are subject to change without notice.
- This manual and the product have been prepared and tested as much as possible. If you find any misprints or errors, please inform Roland DG Corp.
- Roland DG Corp. assumes no responsibility for any direct or indirect loss or damage that may occur through use of this product, regardless of any failure to perform on the part of this product.
- Roland DG Corp. assumes no responsibility for any direct or indirect loss or damage that may occur with respect to any article made using this product.

Roland DG Corporation
This document is the Use's Manual for four models: SG-540/300. This document uses the following notation to distinguish between the four models where necessary. Also, most of the figures in this document depict the SG-540.

SG-540 - 54-inch model
SG-300 - 30-inch model

Deciding On an Installation Site

Install the machine in a quiet, stable location offering good operating conditions. An unsuitable location can cause accidents, fire, faulty operation, or breakdown.

⚠️ WARNING ⚠️ Install the machine in a location that is level, stable, and able to bear the weight of the machine.
The total weight may reach over 230 kg (507 lbs) for the 54-inch model, and 190 kg (419 lbs) for the 30-inch model. Installation in an unsuitable location may cause a major accident, including tip over, fall, or collapse.

⚠️ WARNING ⚠️ Never install this machine outside or in any location where exposure to water or high humidity may occur.
Current leakage may cause electrical shock, electrocution, or combustion and fire.

⚠️ WARNING ⚠️ Never install the machine close to any flammable object or in a gas-filled location.
Combustion or explosion may occur.

⚠️ WARNING ⚠️ Install the machine in a clean, brightly lit location.
Working in a location that is dark or cluttered may lead to an accident, such as becoming caught in the machine as the result of an inadvertent stumble.

⚠️ WARNING ⚠️ Position the machine so that the power plug is within immediate reach at all times.
This is to enable quick disconnection of the power plug in the event of an emergency. Install the machine next to an electrical outlet. Also, provide enough empty space to allow immediate access to the electrical outlet.

⚠️ CAUTION ⚠️ Ensure adequate ventilation for the work area.
Failing to perform ventilation may result in a health hazard or danger of combustion due to ink fumes.

Unsuitable Installation Sites
- Locations subject to large fluctuations in temperature or humidity
- Locations subject to shaking or vibration
- Locations where the floor is tilted, not level, or unstable
- Dusty locations
- Locations exposed to direct sunlight
- Locations near air-conditioning or heating equipment
- Locations exposed to water or moving air
- Locations exposed to considerable electrical or magnetic noise or other forms of electromagnetic energy
1. Installation Environment

**Temperature and Humidity**

Maintain the specified temperature and humidity even when the machine is not in use. Failure to do so may result in malfunction.

During operation: Temperature 20 to 32°C (68 to 90°F), humidity: 35 to 80%RH (no condensation)
During non-operation: Temperature 5 to 40°C (41 to 104°F), humidity: 20 to 80%RH (no condensation)

**Installation Space**

The space shown in the figure is required in order to use this machine.

- 4,250 mm (167.4 in) (54-inch model)
- 3,750 mm (147.6 in) (30-inch model)
- 3,250 mm (128 in) (54-inch model)
- 2,750 mm (108 in) (30-inch model)

Work space

Unit space

1,000 mm (39.4 in)

2,000 mm (78.7 in)
2. Included Items

The following items are included with the machine. Make sure they are all present before proceeding.

<table>
<thead>

</table>

* The media clamps and the middle pinch rollers are installed on the machine.
** 5 pieces are included for the 54-inch model, 2 for the 30-inch.
3. Assembly and Ink Filling

Checks before Operations

⚠️ CAUTION ⚠️

Unloading and emplacement are operations that must be performed by 8 persons or more.
Tasks that require undue effort when performed by a small number of persons may result in physical injury. Also, if dropped, such items may cause injury.

Completed Drawing

Necessary Tools

Hexagonal wrench (large)  Pipe*

* Use this when the hexagonal wrenches are too small to easily tighten bolts.
3. Assembly and Ink Filling

Step 1 : Assembling the Stand and Attaching the Printer

Procedure

1. **Place the caster on the stand leg.**
   Place the stand leg with the tabletop plate facing down, and then place the caster on top of the stand leg. The casters have no particular front and rear orientation.

2. **Lightly tighten the bolts in the 4 upper locations and then in the 4 locations on the sides.**
   For the 4 upper locations, first tighten the bolts in the narrow slots. In this way you can attach the caster in the correct position.
   Use washers in the 4 locations on the sides.

<table>
<thead>
<tr>
<th>Tighten temporarily</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bolts: 8</td>
</tr>
<tr>
<td>Washers: 4</td>
</tr>
</tbody>
</table>

   **Tighten the bolt here first.**

   Narrow  
   Wide
3. Assembly and Ink Filling

3 Fully tighten the bolts in the 4 upper locations and then in the 4 locations on the sides.
Use the pipe when tightening the bolts in the upper locations. When tightening the bolts fully, tighten them securely. Loose bolts may cause the stand to wobble.

![Tighten fully](image)

- **Bolts**: 8
- **Washers**: 4

4 Assemble the opposing stand leg by following the same procedure from step 1 to step 3.

5 Position the stand legs parallel to each other and separated by approximately 1,500 mm (59.1 in.)(54 inch-model), approximately 900 mm (35.4 in.)(30 inch-model).
Position the legs so that the L-shaped brackets face the inside and the bent side of the tabletop plate faces down for each leg.

![Position the stand legs](image)

- **About 1,500 mm (59.1 in.) (54 inch-model)**
- **About 900 mm (35.4 in.) (30 inch-model)**

6 Place the stand stay on the stand legs.
Place the stand stay so that its inside touches the L-shaped brackets and the stand legs in order to make the 2 stand legs parallel.

![Place the stand stay](image)

- **Position the surface with attachment holes toward the casters.**
3. Assembly and Ink Filling

7 Lightly tighten the bolts in the order of ①, ②.
Use a washer for each bolt.

![Diagram](image1)

Tighten temporarily
- Bolts: 6
- Washers: 6

8 Fully tighten the bolts in the order of ①, ②.
Before tightening the bolts, check once more that the 2 stand legs are parallel. If the inside of the stand stay is touching the L-shaped brackets and the stand legs, the stand legs will be parallel.
When tightening the bolts fully, tighten them securely. Loose bolts may cause the stand to wobble.

![Diagram](image2)

Tighten fully
- Bolts: 6
- Washers: 6
Place the printer unit on the stand, and lightly tighten its bolts in the order of ①, ②.
Set the assembled stand upright, and then fix the printer unit to it by tightening the bolts (8 locations in total). Use a washer for each bolt.

Fully tighten the bolts in the order of ①, ②.
Tighten the bolts securely. Loose bolts may cause the stand to wobble.
Step 2: Installing the Media Holders

Procedure

1. Lightly tighten the bolts on the left side of the stand as seen from the rear of the printer. Tighten the bolts in the holes on the left side of the stand until you can see approximately 10 mm (0.4 inches) of their threads.

2. Attach the arm to the lightly tightened bolts.

3. Lightly tighten the bolts connecting the rear of the stand to the arm’s contact surface.
4 Fully tighten the bolts in the order of ① (stand rear), ② (stand side).

Attach the other arm to the right side as seen from the rear of the machine.

Place the shafts on the arms.

Pass the left media holder onto the shafts.
Pass it through from the right edge as seen from the rear of the machine.

Pass the front shaft through the left media holder.
Catch the left media holder on the rear shaft.
3. Assembly and Ink Filling

8 Move the left media holder to the left side of the shafts, and then tighten the retaining screw.

9 In the same manner, pass the right media holder onto the shafts, and then tighten the retaining screw.

10 Attach the shaft clamps to secure the shafts in place.
   To ensure the media holders do not get caught in the shaft clamps, do not place the media holders too close to the edges.
Step 3: Installing the Drain Bottle

Procedure

1. **Remove the bottom plug.**
   Use caution, because discharged fluid used in the inspection when the printer was shipped may remain.

2. **Install the drain bottle.**
   Screw the drain bottle into the hole where the bottom plug was attached. Use caution to turn the bottle without applying excessive force.

*Leave the drain bottle attached at all times.*

Only remove the drain bottle when you are disposing of the discharged fluid. Unnecessarily removing the drain bottle may lead to the discharged fluid spilling.
Step 4: Removing the Retainers

**IMPORTANT**

- Make sure to remove all the retainers. If any remain on the machine, faulty operation or breakdown may occur when the power is switched on.
- Store the retainers because they are needed again when transporting the machine.

**Procedure**

1. **Remove all the retainers indicated by A, B, C and D.**

   ![Diagram of removing retainers](image)

   - Remove retaining tape affixed on the media clamps (in 2 places).

2. **Install the retainer indicated by B at the position indicated in the figure for storage.**

   ![Diagram of installing retainer](image)

   - Bolt removed in step B
Step 5: Connecting the Cables

Procedure

1. Insert the cable clamp.

2. Connect both the power cord and the Ethernet cable (commercially available).
   Use a power plug adapter if the electrical outlet is a two-prong outlet.

   **WARNING** Perform this task with all power switches left switched off. Failure to observe this instruction may cause the machine to move suddenly, resulting in injury.

   **WARNING** Connect the machine to an electrical outlet that complies with this machine’s ratings (for voltage, frequency, and current). Incorrect voltage or insufficient current may cause fire or electrical shock.

   **WARNING** Connect the machine to ground. This can prevent fire or electrical shock due to current leakage in the event of a malfunction.
Step 6: Initial Settings

Procedure

1. Close the front cover.

2. Switch on the main power switch.

3. Open the ink slot cover.

4. Remove all the pouch trays from the ink slots.
3. Assembly and Ink Filling

5. Remove the pouch tray from the cleaning liquid slot.

6. Open the panel cover, and then hold down [MENU] and press the sub power switch.

7. Press [↑] or [↓] to select the language you want, and then press [ENTER].

8. Press [↑] or [↓] to select the unit of measurement you want (for length), and then press [ENTER].

9. Press [↑] or [↓] to select the unit of measurement you want (for temperature), and then press [ENTER].
3. Assembly and Ink Filling

Step 7: Ink Filling

**IMPORTANT**

First use cleaning liquid to clean the print heads, and then fill the printer with each color of ink.

- Be sure to use new TR cleaning liquid pouches and ink pouches.
- Never, under any circumstances, use anything other than the specified type of ink or cleaning liquid.
- TR cleaning liquid pouches (1) that are included with the machine is used on P. 19, “2. Fill the machine with ink and TR cleaning liquid.”
- TR cleaning liquid pouch to be used on P. 23, “4. Fill the machine with TR cleaning liquid.” is needed to be purchased separately. Purchase them from your authorized Roland DG Corp. dealer.

**Items used in this procedure**

<table>
<thead>
<tr>
<th>Included Item</th>
<th>TR cleaning liquid pouch (1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Items separately purchased</td>
<td>Ink pouches (each color), TR cleaning liquid pouch (1)</td>
</tr>
</tbody>
</table>

1. Select the ink type.

1. When the screen shown below appears, press [ENTER].

```
SELECT INK TYPE
TrueVIS 4C
```

2. Press [←] or [→] to select [YES], and then press [ENTER].

```
[YES] NO
```

If the ink type is incorrect, select [NO], press [ENTER], and redo the procedure 1.

3. Make sure the drain bottle is installed, and then press [ENTER].

☞ P. 13, “Step 3 : Installing the Drain Bottle”

```
INSTALL DRAIN BOTTLE
```

The screen shown below appears, and then the machine starts the preparations for the ink filling. The remaining time for the procedure is displayed on the screen. (The display shown below is an example. “20:00” = “20 minutes and 00 seconds”)

```
FILLING INK... >>>>>> 20:00
```
2. Fill the machine with ink and TR cleaning liquid.

1. Set the ink pouch for each color and the TR cleaning liquid pouch in the pouch trays.

2. When the screen shown below appears, set the pouch tray in which you have set the TR cleaning liquid pouch in the ink slot whose number is flashing.
3. Assembly and Ink Filling

3. When the screen shown below appears, remove the pouch tray from the slot whose number is displayed.

REMOVE CARTRIDGE

The screen shown below appears.

FILLING INK...

Hereafter, the same slot number flashes, and the screens shown in steps 2 and 3 are repeated. Follow the instructions on the screen to remove from and insert the pouch tray into the slot whose number is flashing.

MEMO

- When setting the pouch tray: When the pouch tray is set correctly, the number stops flashing and remains lit.

SET CL-LIQUID

- When removing the pouch tray: When the pouch tray is removed correctly, the number stops flashing and turns off.

REMOVE CL-LIQUID

4. When the screen shown below appears, set the pouch tray in which you have set the TR cleaning liquid pouch in the slot whose number is displayed.

SET CL-LIQUID

Repeat the "SET" and "REMOVE" operations multiple times in the same manner as steps 2 and 3.

5. When the screen shown below appears, set the pouch tray in which you have set the wiper cleaning liquid pouch in the cleaning liquid slot.

SET CL-LIQUID

Repeat the "SET" and "REMOVE" operations multiple times in the same manner as steps 2 and 3.
3. Assembly and Ink Filling

6 When the screen shown below appears, set the pouch tray in which you have set the TR cleaning liquid pouch in the cleaning liquid slot.

![Set CL-Liquid](image)

Repeat the "SET" and "REMOVE" operations multiple times in the same manner as steps 2 and 3.

3. Fill the machine with ink.

1 When the screen shown below appears, remove the drain bottle and discard the discharged fluid.

![Empty Drain Bottle](image)

⚠️ **CAUTION** Before you detach the drain bottle, be sure to wait for the screen to display "EMPTY DRAIN BOTTLE." After discarding the discharged fluid, promptly attach the drain bottle to the machine. Failing to follow this procedure may cause discharged fluid to flow out of the tube and spill, soiling your hands or the floor.

⚠️ **WARNING** Never place discharged fluid or ink near an open flame. Doing so may cause a fire.

⚠️ **CAUTION** To store discharged fluid temporarily, place it in the included drain bottle or in a durable sealed container such as a metal can or polyethylene tank, and cap the container tightly. Any spillage or vapor leakage may cause a fire, an odor, or physical distress.

2 Quickly attach the emptied drain bottle to the machine once more.

3 Press [ENTER].

4 Gently shake the ink pouch for each color.
Set the ink pouch for each color and the TR cleaning liquid pouch (Separately purchased) in the pouch trays. Also use two pouch trays which you have used in procedure 2. Remove the one TR cleaning liquid pouch, and then insert the ink pouch.

When the screen shown below appears, set the pouch tray in which you have set an ink pouch in the ink slot whose number is flashing.

SET CARTRIDGE 1234

IMPORTANT
Check the color names indicated on the ink slots and the ink pouches to set all the pouch trays in their correct positions. Insert the pouch trays as far as they will go.
4. Fill the machine with TR cleaning liquid.

1. When the screen shown below appears, set the pouch tray in which you have set the TR cleaning liquid pouch in the cleaning liquid slot.
   Insert the pouch trays as far as they will go.
   
   ![Image of pouch tray insertion](image1)

   The screen shown below appears.
   
   ![Image of FILLING INK...](image2)

   

2. Close the ink slot cover.

3. Press [ENTER].
   When the screen shown in the figure appears, filling with ink is finished.

![Image of ink filling completion](image3)
Be sure to perform operations as specified by the instructions, and never touch any area not specified in the instructions. Failure to observe these instructions may cause the machine to move suddenly, resulting in injury.

Never touch the tip of the blade. Doing so may result in injury. The cutting performance of the blade will also be impaired.

### Step 1: Assembling the Cutting Tool

#### Required items

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Blade holder</td>
<td>Blade</td>
</tr>
</tbody>
</table>

#### Procedure

1. **Insert the pin.**
   
   Insert the pin to the position where its end sticks out about 3 to 5 millimeters.

![Insert pin](image)

2. **Insert the blade.**
   
   Insert the blade into the hole.

![Insert blade](image)
4. Installing the Cutting Tool

Step 2: Installing the Cutting Tool

1. Enter "REPLACE KNIFE" menu.

   1 Press [MENU].

   2 Press [▼] several times to display the screen shown below.

   ```text
   MENU
   SUB MENU
   ```

   3 Press [▼] once, and then press [▼] several times to display the screen shown below.

   ```text
   SUB MENU
   MAINTENANCE
   ```

   4 Press [▼] once, and then press [▼] several times to display the screen shown below.

   ```text
   MAINTENANCE
   REPLACE KNIFE
   ```

   5 Press [ENTER].
   The cutting carriage moves to a position where the blade can be replaced.

   6 When the following screen is displayed, open the front cover.

   ```text
   OPEN FRONT
   COVER
   ```

   Preparations are complete when this screen appears.

   ```text
   FINISHED?
   ```

2. Install the cutting tool.

   1 Loosen the cutting carriage screw.
4. Installing the Cutting Tool

2 Install the cutting tool in the cutting carriage.

3 Tighten the screw.

4 Close the front cover.

5 Press [ENTER].

**Important note on the handling and use of the cutting carriage**

Leave the cutting-carriage screw loose when no cutting tool is installed. Keeping the screw firmly tightened causes the cutting tool insertion hole to become gradually smaller, making installation difficult.
5. Network Settings

The examples used in the procedures for making the settings described in this section assume you are using one computer and one machine. The settings used in this section are merely example settings. The procedures and setting values described here may not be suitable for all operating environments.

If the computer you’re using is connected to a number of networked devices or to the Internet, incorrect settings may adversely affect the entire network. For detailed information about the settings, consult your network administrator.

Step 1 : Make the Network Settings for the Computer

Procedure

1. Log on to Windows as the "Administrator" or a member of the "Administrators" group.

2. Windows 10:
   From the [Start] menu, click [Set], and then click [Network and Internet].
   Click [Network and Sharing Center].
   Click [Ethernet] or [Wi-Fi].

Windows 8.1:
From the [Start] menu, click [PC settings], and then click [Control Panel].
Click [Network and Internet], and then click [Network and Sharing Center].
Click [Ethernet] or [Wi-Fi].

Windows 7:
From the [Start] menu, click [Control Panel].
Click [Network and Internet], and then click [Network and Sharing Center].
Click [Local Area Connection] or [Wireless Network Connection].
Click [Properties].
The [Ethernet Properties] dialog box appears. (On Windows 7, the [Local Area Connection Status] dialog box appears.)
If the [User Account Control] dialog box appears, click [Continue].

Select [Internet Protocol Version 4 (TCP/IPv4)], and then click [Properties].
If the [Internet Protocol] check box is clear, select it.
Select [Use the following IP address]. Enter the information as shown below, and then click [OK].

<table>
<thead>
<tr>
<th>Item</th>
<th>Address to enter</th>
</tr>
</thead>
<tbody>
<tr>
<td>IP address</td>
<td>192.168.0.XXX</td>
</tr>
<tr>
<td>Subnet mask</td>
<td>255.255.255.0</td>
</tr>
</tbody>
</table>

Here, “XXX” can be any number from 1 to 254. However, be sure to specify a number that is different from the numbers used for other computers and devices.

Step 2: Make the Network Settings on the Printer

1. Set the IP address.

   1. Press [MENU].

   2. Press [→] several times to display the screen shown below.

   3. Press [←] once, and then press [→] several times to display the screen shown below.
5. Network Settings

4. Press [▲] 3 times to display the screen shown below.

![IP ADDRESS](image)

6. Press [▲] or [▼] to select the address number.

8. When you have finished making the setting, press [ENTER].

2. Set the subnet mask.

1. Press [▼] to display the screen shown below.

![NETWORK](image)

3. Press [▲] twice to display the screen shown below.

![SUBNET MASK](image)

5. Repeat 6 and 8 to set [IP ADDRESS] (192.168.000.XXX).

Here, "XXX" can be any number from 001 to 254. However, be sure to specify a number that is different from the setting you made in Step 1 and from the numbers used for other computers and devices.

For the part corresponding to "192.168.000," apply the same value as the setting of your computer.

Here, "192.168.000.003" is entered by way of example.

![IP ADDRESS](image)

7. Press [▲].

9. Press [◄] to go back to the screen shown below.

![NETWORK](image)

10. Press [▲] or [▼] to select the address number.

11. Press [▲].
5. Network Settings

5. Repeat 3 and 4 to set [SUBNET MASK.]
   For the subnet mask, make the setting the same value as the one used by the computer. Here, "255.255.255.000" is entered by way of example.

   SUBNET MASK
   255.255.255.000

6. When you have finished making the setting, press [ENTER].

7. Press [a] to go back to the screen shown below.

   NETWORK
   SUBNET MASK

   If you are using the computer and the machine on a one-to-one basis, this completes the settings to make on the printer.

   Press [MENU] to go back to the original screen. Then, proceed to "Step 3 : Make the Port Settings for the Software RIP" (P. 32).

   If you need to set the gateway address, proceed to the following procedure.

3. Set the gateway address.

1. Press [v] to display the screen shown below.

   NETWORK
   GATEWAY ADDR.

2. Press [a] twice to display the screen shown below.

   GATEWAY ADDR.
   000.000.000.000

3. Press [a] or [v] to select the address number.

4. Press [a].

5. Repeat 3 and 4 to set [GATEWAY ADDR.]
   For the value to enter for the gateway address, consult your network administrator. Here, "255.255.255.255" is entered by way of example.

   GATEWAY ADDR.
   255.255.255.255

6. When you have finished making the setting, press [ENTER].

7. Press [MENU], to go back to the original screen.
5. Network Settings

Step 3: Make the Port Settings for the Software RIP

The settings for the software RIP will be made here. For information about how to make the settings, refer to the documentation of the instructions for the software RIP.

Confirming that a network connection has been established

Roland VersaWorks Dual (hereinafter referred to as "VersaWorks Dual")
You can use the printing-test feature to check whether the connection to the network has been established. For information about how to carry out a printing test, refer to the documentation for VersaWorks Dual.

Other software RIP
Refer to the documentation for the software RIP you are using.
